SCOPUS AUTHOR ID - HOW TO MERGE MULTIPLE IDS

SCOPUS AUTHOR IDENTIFIERS (IDS)

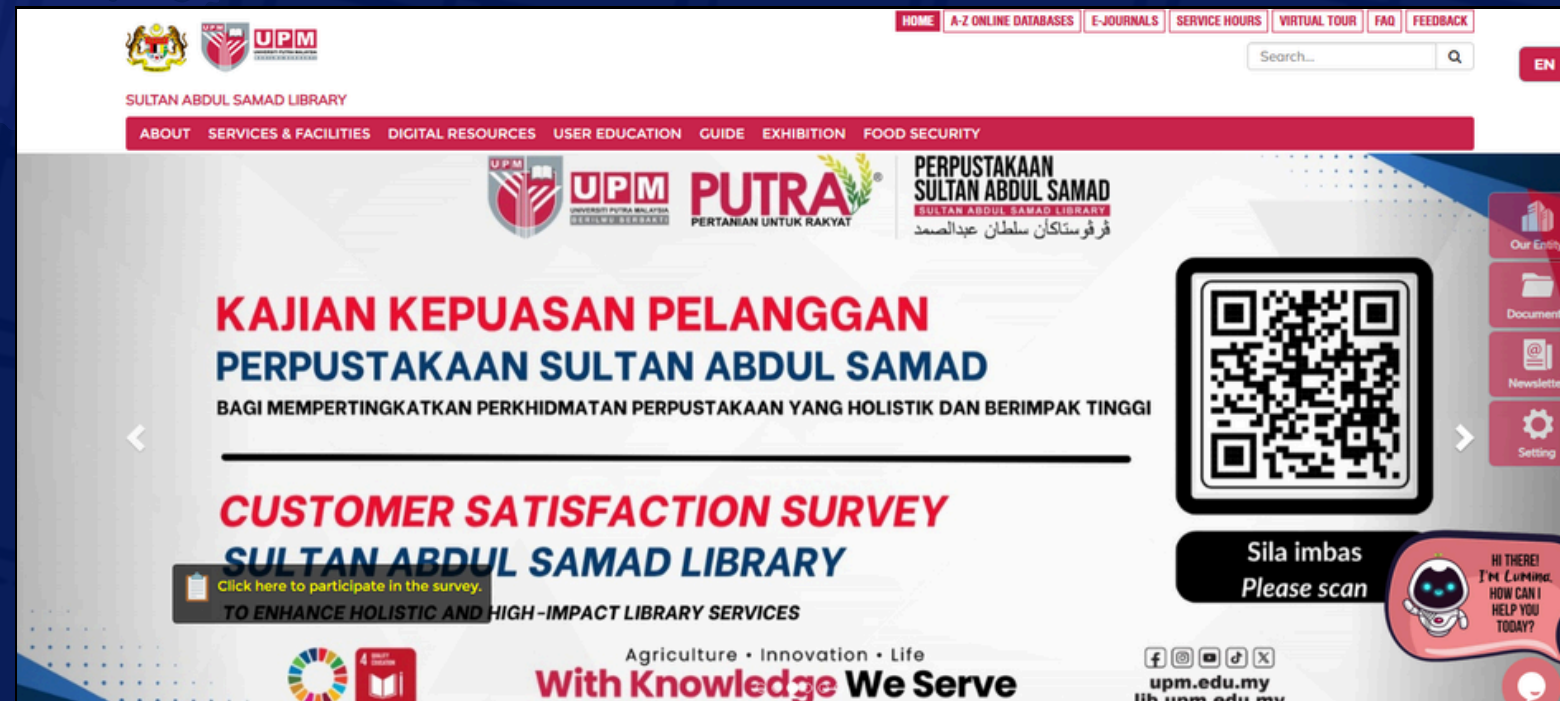

- Scopus Author ID is automatically assigned when you publish two or more works in a journal indexed by Scopus.
- The algorithm generates your ID based on your name, email, affiliation, subject area, citations and co-authors.
- You may have more than one ID generated if you have published with variant names and affiliations.
- Having a Scopus Author ID allows you to easily see a list of your publications and view citation metrics such as h-index measures, citation counts, publications and co-authors.
- Scopus Author ID can be linked to ORCID so publications can be imported into your ORCID.

Document & citation trends

The chart displays two data series: Documents (represented by blue bars) and Citations (represented by a black line with circular markers). The x-axis represents years from 2000 to 2026. The left y-axis represents the number of Documents (0 to 20), and the right y-axis represents the number of Citations (0 to 1,000). Documents show a steady increase over time, peaking around 2024. Citations show a sharp increase starting around 2020, peaking around 2024, and then declining.
